

Boise provides a fresh
new look for Bear Construction.

Each executive office features a cherry wood desk, bookcase and credenza. Massaging office chairs provide the finishing touch.

Boise designs and delivers new interior furnishings on-time, on-budget.

When Bear Construction planned to move its headquarters to a new 36,000 square foot facility, they wanted the interior to look as stunning as the building itself.

They chose Boise Office Solutions as their single source for furnishings. Bear was sold on Boise's product knowledge, design expertise and customer service.

BOISE[®]

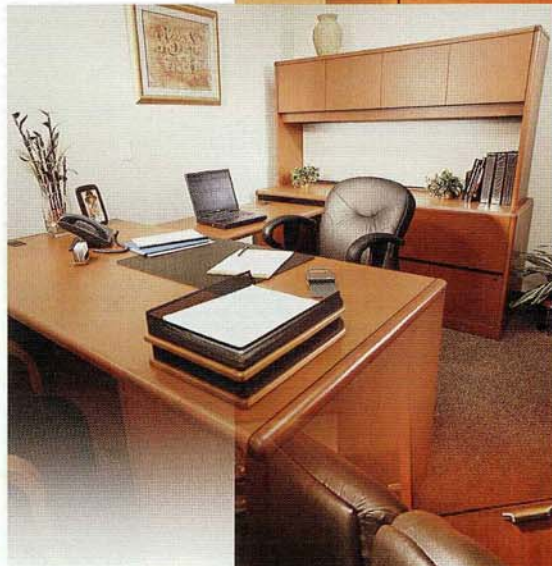

Office Solutions

Working closely with Bear representatives, Boise used the latest CAD software to design an attractive, functional interior layout. Boise also gave the Bear staff a firsthand look at a variety of furniture styles to match their individual needs. And Boise provided guidance with carpet selection, paint colors and fabric choices.

With smooth teamwork between Bear and Boise, the project was completed on time and on budget. The result is a dramatic new headquarters for Bear Construction that combines beauty and a professional atmosphere.

Speed and cost savings were key considerations.

As a small business, Bear Construction had a limited budget for interior furnishings. In addition, the entire project and relocation had to take place in a matter of months. Boise Furniture Specialists met the challenge. They created an appealing, eye-catching interior with a cost-efficient design. And Boise completed all work in time for the new headquarters' opening.

Private offices are furnished with these contemporary laminate desks, accented with hardwood. Each office includes a comfortable desk chair and guest seating.

This large conference room features a handsome granite table and highback leather seating. Smaller conference rooms include highback fabric chairs and a laminate boat-shaped table.

The attractive lobby presents an innovative look with lounge seating, an occasional table and artwork.

BOISE

Office Solutions

Boise furnishes everything from a lunchroom to conference rooms.

Bear Construction needed furnishings for a wide range of workspaces, including 12 private offices, 12 workstations, three conference rooms, a lunchroom/training room, lobby and reception area. Because Bear has a steady volume of walk-in traffic, the company wanted a sharp appearance plus a productive design for workflow. Boise delivered.
