George,

On behalf of Cingular Wireless, I want to thank you and your team for the great accomplishment on the Schaumburg mobile switching office construction project. This project had a very short window of opportunity, to accomplish a series of tasks that would allow Cingular Wireless to grow the business. Our goal upfront was to supply power for supporting new growth by an April 15th date in 2005, and have equipment rooms prepared for service. Your team stepped up to the plate, overcame several obstacles, to achieve our goal on time. Again on the behalf of Cingular we appreciate the service and quality provided by all your construction teams on this project.

Sincerely

Jeff Benson
Network Implementation-Project Engineer
